

Express3

Basic App 1

```
const express = require ('express');

const app = express();

const port = 3000;

app.listen(port,() => {
  console.log(`Server started on port ${port}`);
});
```

Basic App 2

```
const express = require ('express');
const app = express();
//How middleware works
app.use((req,res,next) => {
  req.name = 'Akash Salunkhe';
  next();
});
//Index Route
app.get('/',(req,res) => {
  console.log(req.name);
  res.send('INDEX');
});
//About Route
app.get('/about',(req,res) => {
  res.send('ABOUT');
});
const port = 3000;
app.listen(port,() => {
  console.log(`Server started on port ${port}`);
});

//Note that here we are using req.name to set name so that we can access name through the program.
```
