Mongoose

install mongoose

```
npm install mongoose --save
```

require mongoose

```javascript
const mongoose = require('mongoose');
```

Connect to mongoose

```javascript
//Connect to mongoose after const app = express()
mongoose.connect('mongodb://localhost/vidjot-db')
.then(() => console.log('MongoDB Connected...'))
.catch((err) => console.log(err));
```

Create a schema and model in other file

```javascript
//Create a folder called models and then create your models in there

//eg inside models folder create Idea.js

//Note starting letter is in uppercase

const mongoose = require('mongoose');
const Schema = mongoose.Schema;
//Create Schema
const IdeaSchema = new Schema({
title:{
type: String,
require: true
},
details:{
type: String,
required: true
},
date: {
type: Date,
default: Date.now
}
});

module.exports = mongoose.model('ideas',IdeaSchema);
```

Import Idea model in app.js

```javascript
//Load Idea Model
const Idea = require('./models/Idea');
```
