Creating custom reusable component

Creating a div inside where we can put any component which makes it scrollable and border and height

```jsx
//Creating Scroll div -

import React from 'react';

const Scroll = (props) => {
return (
<div style={{overflow:'scroll',border:'5px solid black',height:'800px'}}>
{props.children}
</div>
)
};

export default Scroll;

//Using it -

<Scroll>
<CardList robots={filteredRobots} />
</Scroll>
```
